COVER GEOMETRY

Trim size	6" × 9" (portrait)
Bleed	0.125" on all four sides
Spine width, as built	0.75"
Full wrap, with bleed	13.0" × 9.25"
Safe margin (text/logos)	0.375" inside trim
Panel order, left to right	Back — Spine — Front

Spine is page-count dependent. 0.75" assumes ≈300 pages on cream 55 lb stock (0.0025"/page). Recalculate with the printer's own formula once the final interior page count is locked, and request an updated wrap — the file regenerates to any spine width.

FILE DELIVERY

Cover file	Single PDF, one page, full wrap
Page size in PDF	13.0" × 9.25" exactly
Photograph resolution	300 dpi at placed size
Type	Live vector text (not rasterized)

OPEN ITEMS BEFORE RELEASE TO PRINT

1. **Final page count** → printer recalculates spine width; wrap file updates to match before submission.
2. **ISBN & barcode** — white barcode area is reserved at 1.6" × 0.95", lower right of back cover. Place printer-generated EAN-13 barcode there; ISBN line currently shows a placeholder.
3. **Retail price** — back cover shows U.S. \$28.00 / CAN \$37.00; confirm or strike before print.
4. **Finish** — recommend matte lamination; gloss acceptable. No interior file is included in this hand-off.
5. **Proof** — request one physical proof before the sales run; verify the ivory field prints warm (not gray) and skin tones hold.
